Family Medicine Certification Requirements:

Current Status: Meeting Requirements

Beginning in 2011 certification by the American Board of Family Medicine is maintained through successful completion of the Family Medicine Certification process. The Family Medicine Certification process is a continuous process that requires being in compliance with Guidelines for Professionalism Licensure and Personal Conduct including maintaining a currently valid, full, and unrestricted license to practice medicine in the United States or Canada, completing certification activities in a timely fashion, and performing successfully on the examination every ten years. Failure to maintain any of these requirements will result in the loss of certification status with the ABFM. Based upon the continuous nature of Family Medicine Certification, no end date for certification is presented above.

Certification in Family Medicine was for a period of seven years. From 1970 through 2002, certification was renewed by completion of requirements for Recertification. Each physician (Diplomate) fulfilled these requirements by maintaining a medical license to practice medicine in the United States or Canada, earning 300 hours of continuing medical education (CME), completing a computerized office record review, and performing successfully on the recertification examination.

In 2003 family physicians who performed successfully on the Certification and Recertification examinations began a gradual transition from Recertification to MC-FP. MC-FP was designed to transition all Diplomates into the program by 2010, enrolling all physicians who certified or recertified as they successfully passed the examination.
