

When you have as many children as you want, vasectomy is an **excellent option**

- **No more worry** about unplanned pregnancy
- **Less risk for your partner** from ...
 - ... Other less-effective contraceptive methods
 - ... Unplanned pregnancy
- With fewer children **each child gets more:**
 - ... Healthy food
 - ... Nicer clothes
 - ... Better education
- With fewer children ...
 - ... Partner not overworked
 - ... **Better SEX !**

No-Scalpel Vasectomy International

NSVI is a nonprofit organization made up of vasectomy experts who train doctors and provide services throughout the world.

www.NSVI.org

www.WVD.org

NSVI partners with WVD

World Vasectomy Day

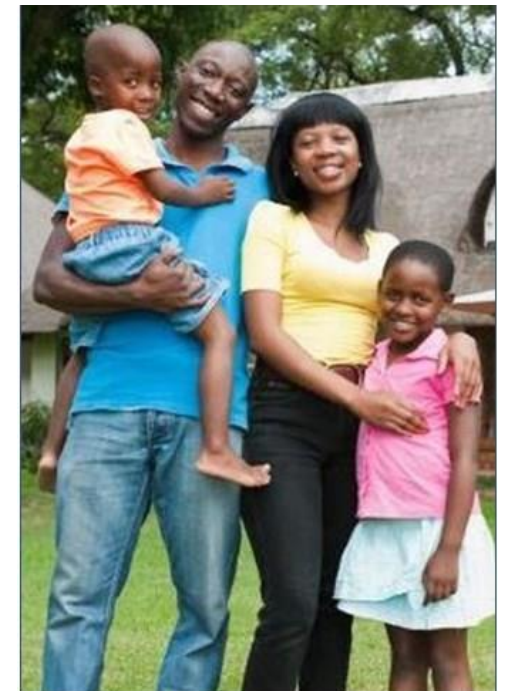

celebrates men who partake in family planning through vasectomy, advocates for more widespread availability of vasectomy, and connects NSVI with areas in need of vasectomy services and physician training.

Vasectomy is **very popular in the USA, Canada, and Australia** among men who have had as many children as they desire.

NSVI doctors have extensive experience performing vasectomy in their home countries. They travel periodically to host countries (Philippines, Haiti, Kenya and more) to offer this service and local physician training so that men worldwide can take control of their family size and more effectively support their wives and children.

easy VASECTOMY

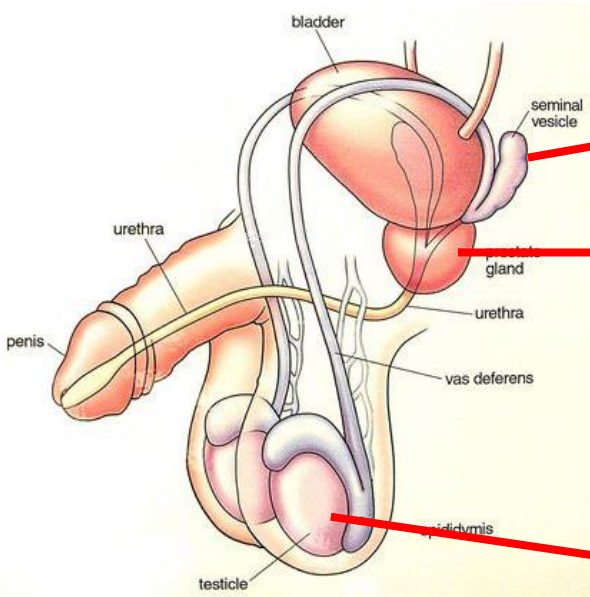

Simple birth control for **MEN**

When your family is complete.

Yes!

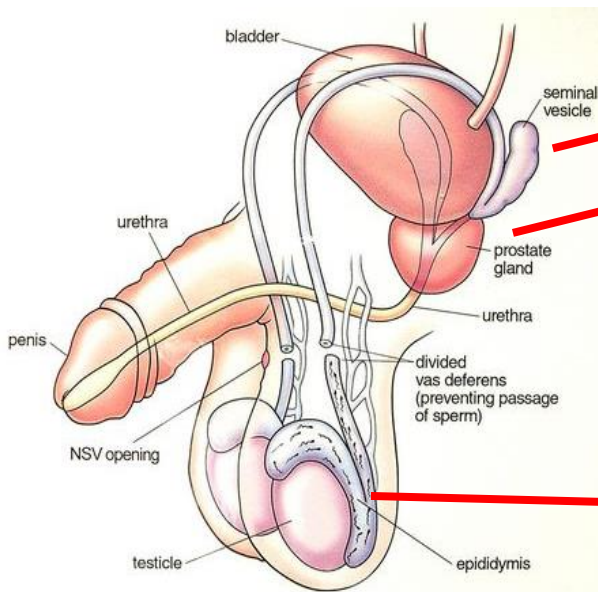

Before VASECTOMY

95% of semen produced by seminal vesicles and prostate.

Only 5% of semen is sperm from the testes.

After VASECTOMY

No change in seminal vesicles or prostate so **no noticeable change in the semen, except ...**

No sperm in the semen.

What changes after vasectomy?

Nothing, except that sperm are no longer in your semen and you won't get anyone pregnant. You will probably notice:

- **No change** in the **semen**.
- **No change** in your **sex drive**.
- **No change** in **orgasm**.
- **No change** in **testes or scrotum**.
- **No change** in **erections**.

Most couples enjoy sex more!

- + Ten minute procedure
- + Most people say ... 
 - ... No pain
 - ... Mild discomfort 2 days
 - ... Resume sex and work in 2 days
